#### LOCAL NOTES.

Judge Drum will go to the coast on legal business, early next week.

It is reported that Judge Colby is not averse to receiving legislative honors.

Mrs. Stantyn, one of the teachers at the public school, has returned from her summer recreation.

Assessor McCarty's is busily engaged as sessing city property. Mr. Lawrence O'Geary is his assistant. The case of Long, on trial before Judge

Felter, charged with stealing cattle in Sulphur Springs valley is going on. Ben Goedrich arrived in the city Thurs-

day evening, after making a trip through the county. He reports his fences in good A report reached town last night that

twenty-five Indians were killed in the lower end of the Sonoita valley. It is probably a capard. Don't forget that the ladies of the Episcopal church will give another of their

Wednesday evening. Con Cutler is again in town, having

returned from the Steeple Rock District, New Mexico, where he went to have a look at the Carlyle mine. The public schools will open next Mou-

day. Prof. Sherman is anxious that all the children should be present on the opening day, so that they can be properly

Captain Madden, commanding officer at Fort Huachuca, dropped into town yesterday atternoon, and spent last night in the midst of his many Tombstone friends. He will probably return to the post this after-

Messrs. Van Blareom and Liftchild returned from Victoria, yesterday afternoon, pretty well scorched by the warm sun. They report that district as booming and hesitate not to assert that it will be the "future great."

### BETTER NEWS.

The Reported Indian Raid in the Sonoita Valley a Mistake-No flostiles on This Side.

Captain Madden, the commanding officer at Fort Huachuca arrived in town last evening from the post, and was soon after corralled by an EPITAPH man, who applied the news batteries to extract whatever Indian information the captain was possessed of. It was learned that the reported slaughter in the Sonoita valley was all a mistake, there being no hostile Indians this side of the line. Lieutenant Glass, who commanded the detachment sent out four or five days ago, penetrated about fifteen miles, and scouted the Santa Cruz valley thoroughly. The Mexicans bailed the advent of our troops with joy, and showered all the favors they were capable of on them. The alcalde of Santa Cruz sent out guides with the troops to a point where it was reported the hostiles were intrenched in force. On arriving there, bowever, the troops found neither Indians or a trace of them. They found the trail, however, and followed it closely until the junction of the Sonoita and Santa Cruz was reached. Here the bestiles evidently camped for a short while, and then turned southward, in the direction of Magdalena Some of the Indian scouts who accompanied the command took a trip up the Bonoita Valley, and it is more than likely that from this incident sprang the alarm in the southern wing of Pima county. The scouts were seen by some of the settlers, and the cry of "Indians!" was wafted along almost as rapidly as the breezes. The settlers abandoned their homes and fled precipitously to Calabasas, spreading a report of Indian depredations that was multiplied twofold each time it was repeated.

Captain Madden is of opinion that the hostiles did not cross the line, but were depredating with all their old vindictiveness on the other side. The people of Santa Cruz were in a state of abject terror, all the people of the valley having abandoned their ordinary vocations and gone into the town for mutual protection. The band that swept through the Santa Cruz valley numbered between eighty and a hundred men, and were all apparently well armed.

Card.

In reply to the article published in the EPITAPH Tuesday morning, about the row at Ramany's Canyon, permit me to state that I consider the so-called bad map a gentleman, as he habitually pays his bills and does not steal from his fellow citizens, something I cannot say for W. H. Ramsey. He has stolen wood from John Conners, and I can prove it. I do not want to defend any man who goes brawling and filibuster-ing, but I think that a little wild foolishnes, done under the influence of liquor, is not by any means as culpable as robbing Ramsey's Canyon.

#### WEEKLY MINING REVIEW.

The past week has been uneventful in local mining annals. Except striking water in the Empire, and tapping a body beyond commonplace occurred. The following is the latest news from the working mines in the district. As will be seen the every week.

The north drifts in the 400 and 450 levels are looking about the same, and making good progress. The south drift on the 450 level looks very promising, and the west crosscut in the same level is improving and the formation changing. The stopes are all looking well and the ore bodies throughout the mine improving generally. The winze from the 450 level is down 40 feet and struck water. The ore at the water level and below is of a superior quality, and gives every indication of staying qualities. The water level is 490 feet from the surface. Several shots were put in after the water level was reached, and all broke better ore than had been hotsted to the sur ace heratofore. This is of vast importance, as it proves beyond doubt that the mineral extends below the

level of the water. CONTENTION.

There has been no change of consequence in this mine for the past week. The drifts on the 600 level are being pushed along vigorously, and confirm the good impressions heretofore promised. The formation is exceptionally good, and there is not a doubt lingering but that the best body of ere yet encountered has just been tapped. The stopes throughout the mine are looking excetlent, and the usual quantity of ore is being raised to the surface. The following from the last number of the Mining Record will be of interest: "The Contention Consolidated Mining Company have declared their seventh successive monthly dividend of twenty-five cents a share, aggregating \$62,500. Total of dividends to present date, \$437,500." GRAND CENTRAL.

Running along as usual. Making good progress on the crosscut on the 600 level. The indications are excellent, but not of such quality as a battery can go to work and extract bullion from. The stopes are all looking well, but have not been worked extensively for the past few days, in consequence of the dump wall at the mill getting washed away, and it was necessary to repair it before more ore could be shipped. Things are fixed now, however, pleasant socials at the Court House next and everything is running along as usual. FAIR VILLA.

South drift on 100-foot level is now 27 feet in length, mostly in hard blasting rock. Have encountered considerable good ore in small quantities. Will run the drift about eight feet more and start to crosscut. Sinking main shaft from 100 foot level will be resumed in a few days. Everything about the mine working in first-class order. HEAD CENTER.

Nothing of unusual importance transpired here during the week. About thirtyfive tons of ore is being hoisted to the surtace daily. Taking out ore chiefly between the first and second levels. Sinking on the main incline shaft. Mine looking better than ever. The steam hoist working exceptionally well.

TRANQUILITY.

Still hoisting ore from the whip shaft. The stope west of the shaft has been raised to the surface. Connection has been made with the Head Center works. Are now engaged building a chute, and when completed, ore will be hoisted through the main shaft. Started a drift south from the 115 level a few days ago, and some very promising indications of ore were brought to the surface last evening. Made connection between the main and whip shatts Monday evening. The mine is in excellent condition and turns out some of the richest ore at present being extracted in the camp. Ten stamps of the Girard mill are still working on Tranquility ore.

BAN PEDEO. Winze on the 205-foot level down 62 feet, all through ledge matter, with little change since last report. West drift on same level progressing rapidly, with most favorable improvement. Length of drift from shaft, 44 feet. Stoping ore on the 232 foot level discontinued on account of bad air. Shaft in southwest side line down 12 feet having 18 inches of good ore in the bottom and about six tons on the dump.

HORSESHOE. Work on 225 foot level progressing as fast as the intense hardness of the quarzite will permit. A seam of highly mineralized porphyry in the breast is widening and improving as progress is being made.

COPPEROPOLIS. Shaft now reached a depth of 85 feet, with most satisfactory results. Ore in the bottom of shaft getting more solid and showing traces of copper.

SEA SURGE. Shatt No. 2 now down fifty feet and a crosscut will be started at that depth this morning. The mine looking very favorable. All the miners taken from shaft No. 1 and transferred to No. 2. Two shifts at work, and some very good ore being

extracted. Things are running along about the same at this mine. An upraise has been started from the west drift on the 80 level, to connect with an old shaft. Commenced stoping ore up from the 120 level. Taking out more ore at present than formerly. A fine stope of ore has been opened up fifty feet from the surface, north of the shaft.

Are rapidly getting ready for a steam hoist,

which will be on the ground in a short

MOLLIE. This promising claim is still being worked vigorously. At present following a very promising ledge three feet eight inches wide, from which very flattering assay returns are being obtained. The ledge dips at an angle of thirty degrees. Sinking an incline on the vein.

LUCK SURE.

A force of men are kept steadily at work on this claim, and some fine ore, assaying as high as \$10,000, is being taken out. Shaft No. 1 now down 50 feet, with a fine yein of very high grade ore such bad politics.

Young Ned Wiley is the pride and de-

bonancas in the camp at no distant day.

STONEWALL. The new double compartment shaft is down about fifteen icet. The rock is very steal anything he wanted. The burro was of rich ore in the Little Devil, nothing hard and work progresses very slowly. Crosscutting is continued from the 160 level, with very promising results. Some stoping is being done on the 100 level, and number of claims being worked increase a fair quantity of ore hoisted daily. The mine was never in better condition, and everything runs along swimmingly.

EAGLE. The main incline is now down something over 100 feet, and shows up a very promising body of ore. Shaft 2 is down about sixteen feet, and has cut several strata of very rich ore. The mine is in a very promising condition, and under the capable management of Superintendent Thompson, promises to become the great mine of the western portion of the district ere many months.

CONTACT. Work has again started up on this claim, but owing to bad air, not much is being his brother about a mile and a half from done until a blower is placed in position, to force down fresh air.

MARGURITA. Still sinking on the main shaft, and the indications become more promising daily. The ore body is continuous, and becomes richer with each blast.

LITTLE DEVIL.

This claim has made the proudest record in the camp during the past week. An extremely rich body of ore was encountered in the shaft at a depth of 65 feet from the surface. The shaft contained ore matter all the way and gave very fair assays, but at the point above mentioned a threeloot vein of \$1,000 ore was discovered. Drifts will be started both ways at 62 feet, and the rich ore body followed up. Mr. Burke, the superintendent, has shipped a ton of the ore to Mr. H. A. Tweed, 118 Chambers street, New York, who is one of the owners of the mine. Still sinking on shaft: now down 72 feet.

Shaft down 114 feet in very promising mineralized rock. A level will be cut out at 100 feet from the surface and crosscuts started both ways.

T. M. & M. CO.

The body of ore heretofore reported in the combination works is expanding, and promises to develop finely when further penetrated. Sinking is continued in Goodenough and West Side, and both are looking very favorably. The ore body in the incline shows up better as further developed. The mine is in excellent condition, and everything looks well. WINFIELD.

This promising mine continues to improve daily. The drifts are making good progress and showing up well. VIZINA.

The works heretofore reported are continued at this mine, and everything looks favorable in the extreme.

Work progressing favorably on both

MOZAMBIQUE.

shafts, both being down between thirty-six and forty feet. The ore body is improving, and everything is encouraging in the extreme. GUELPH CONSOLIDATED. The shaft has now attained a depth of 40

quality of ore. The ore body has been opened to a width of six feet without indication of walls. A very promising property. BLUE JACKET. Work pushed ahead vigorously on the

feet and is still being sunk in a very fair

own about fifty feet in a fine bady of ore. making good progress. C. O. D.

looks encouraging. OLD GUARD. A fine body of ore was discovered a few

days ago, assaying away up in the hon- than likely that the outrages have been on guard. dreds. A chunk of ore weighing about more general than the public is aware of. fifty pounds was sent to New York. The mine never looked better. LIMA CONSOLIDATED.

The main incline down about 183 feet. The ground is very favorable for working, and good progress is being made. The mine is in very fine condition.

FRANKLIN. The two crosscuts are being pushed for-

ward rapidly, and the indications of an ore body are excellent. Several strata of rich ore were cut, but none of them considered extensive enough to follow up. PEARODY (RUSSELVILLE).

Reports from this excellent mine are very flattering. Every drift, stope and winze in the mine is producing ore of a very high grade. The upraise is now about 54 feet from the main drift.

NOTES Superintendent White of the Contention is expected home from California in a few

THE KILLING OF JOHNSON. The Particular of His Death as Giver By His Brother.

Mr. A. G. Curry, a step-brother of Ton Johnson, whe was killed by ahe Apaches, near the head of the Sonora river a few days ago, furnishes the following particu-

ars of that sad event: On the morning of Monday last Mr. Johnson left home in a single buggy, with a led horse, bound for Charleston where he was coming for a hack. He forgot to take his rifle and pistol with him. Upon the discovery of this fact Mr. Curry jumped upon a horse and rode after him. saking both rifle and pistol. He overtook where he was found dead. Mr. Johnson would not take the gun, telling his brother to take it back with him. He took the pistol and drove on, Mr. Curry turning around and going home. A short distance from where they parted-as it proved, forever-Mr. J. W. Hohstadt and another man who were coming to Tombstone with an ox team, were plodding along in unmelested security. Driving along leisurely, unsuspecting danger, evidently without a moment's warning.

he was shot through the back, the ball coming out through the breast. Another shot ranged downward. coming out near or through the groin. In his body was found a lot of buckshot. One of his legs was also broken. He was stripped of his clothing and everything he had on him. They killed one of the horses and took away the other. The harness was all cut to pieces, and the buggy was run up into a canyon about three hundred yards away.

That night about 11 o'clock two Americans and an Italian came to the Janiverichi and notified them of the finding of the buggy and wrecks of the harness. They had seen four or five Indians traveling toward the Cananea, but were not molested. Mr. Curry said they hoped that Mr. Johnson had escaped on one of the torses. They immediately raised a party of men to go in search of the missing man, and when on the road they met a couple of Mexicans, who notified them of finding the body over a little bank, just off the side of the road. They went back, or part of them, and got the poor man's mother and stepfather and brought his body to San Pedro, where they were obliged to bury it, decomposition having too far advanced to allow of his being brought to Charleston.

It is more than likely that the flends who murdered Mr. Johnson and those operating in the Santa Cruz valley are members of the same band. There has been no late reports of their doings in the Santa Cruz, and it is more than likely that the appearance of the soldiers on the scene made them shift their quarters to more congenial resorts.

A miner who returned to the city yesterday from Sonora brings further reports of desolation and murder. The settlers in the northern portion of the State, near the San Pedro, are terrorized, and several have fallen victims of Apache atrocities. Willie Hohstadt, a son of J. W. Hohstadt, two shafts and tunnel. Shaft No. 2 is who was recently in this city, is reported killed. He was traveling from his father's with the quality improving. The tunnel is norn river, when the murderous bullet now down to a depth of 105 feet. The ore Bauchochi district, but hearing of the cluded to turn back. Several dead bodies were reported found between the San Pedro and Hohstadt's ranch, and it is more

#### INDIANS AT CALABASAS. The Red Devils Reported Desolating the Sonoita Valley.

A gentleman arrived from Fort Huachuca last evening bringing tidings of further outrages by Indians, this time nearer home. From the gentleman referred to it was learned that a courier had reached the Fort with the news of an Indian raid in the Sonoita and Santa Cruz valleys, and murdered not less than fifteen people in the neighborhood of Calabasas. The entire valley, from Crittenden south, is deserted, and the inhabitants neeling in abject terror to Calabasas and other towns for protection. The savages entered the valley from Sonora by the Santa Cruz, spreading death and desolation in their course. Men, women and children were ruthlessly slaughtered, houses burned and other species of vandalism committed The inhabitants of Calabasas were reported preparing for an attack, and resolved to give the red devils a warm reception.

On receipt of the news, Captain Madden, commander of the post, gave orders to the troops to prepare to march immediately, and by this time troops are hastening to the defense of the settlers. The company sent out a few days ago in the direction of the Santa Cruz have not yet been directly heard from, though a report reached the post that they were on the trail of the hostiles, and not far behind them.

FOUR MORE VICTIMS.

The Mutilated Bodies of Four Ameri-

Mr. J. A. Holley, better known to most Tombstone people as Texas, reached this city yesterday from Las Delicias, Sonora where he had been employed for some months back. Mr. Holley reports finding the bodies of four Americans on the road between the Bachanochi and Cananca ranches on Monday last. They were apparently miners or prospectors, and their bodies were horribly mutilated. They must have been at least twenty-four hours dead when he found them, as decomposition was setting in. He did not recognize any of them. Two of them were completely stripped of all clothes, while the others were partially dressed. They were within a few yards of each other. Letters and papers were scattered around, but Holley did not wait to investigate the contents, as the Indian tracks in the vicinity were alarmingly fresh. He was afraid the red devils were still in the vicinity, and thought the satest course for him to pursue was to hasten away from the ghastly scene as rapidly as possible. He reported seeing six Indians two miles this side of where the killing was done, but hid himself in an arroya until they passed out of sight. He is of opinion that the murderers were the same gang who killed Tom Johnson, and belonged to the party that made the raid in the Santa Cruz valley, as the six Indians he saw were heading in that direc-

Contention Democrats.

The Democrats of Contention assembled at the saloon of Dr. J. G. Barney on Wednesday evening last and formed the Contention Democratic Club by electing Henry K. Hause president, S. Marks vice president, Pedro Michelano secretary, and E. M. Severance treasurer. Before the organization of the club the various members signed the following:

"We, the undersigned legal voters of the town of Contention, Cochise county, do hereby agree to support the nominees of the Democratic Territorial Convention of the Territory of Arizona and the Demo cratic County Convention of Cochise county at the election of Territorial and county officers, to be held November 7. 1882, and for the purpose of unanimous action, and for the welfare and success of the Democratic party, we hereby organize ourselves into a Democratic club, to be known as the Contention Democratic Club. the officers of which shall be a president, vice president, secretary and treasurer, and such other officers as shall be hereafter chosea."

The names of those who have this far signed the club roll are as follows: S Marks, Charles Myers, A McDermott, S 1

Weisse, J B Ludwig, Wm Costello, H K Hause, P Michelano. E M Sevelence, John Weish, H V Clarke, L W Myers, L Zier, Juan Navarreau, J T Mills, L Larien, Joe Revnolds, Robert Barry, J R Dunn, H S Robep, John Green, Dan S Rich, Frank Brown, T S Hafee, H W Hagen, D M

The club list is in the hands of the presi dent, secretary, vice president and treasurer for all those who desire to enroll as per direction of the county committee.

S. Marks, Chas. Myers and Juan Navarreau were appointed judges of election at the primaries.

## VIGORIT POWDER!

JUDGE FIELD OF THE U. S. SUPREME COURT DECIDED, OCTOBER 12, 1890, THAT Vigorit Powder is no infringement of the Giant Powder patents, but on the contrary "in no respect within their contemplation." It is ludicrous as well as libelous therefore to term this powder an adulteration or imitation of one scientifically inferior.

Experience and use have proved for the Vigorit Powder: 1st—That it is a safer powder for transporting and handling than the other Nito-Glyceria Powders heretofore made
2d—That with an equal explosive power it is very free from hurtful fames.
3d—That it is much less affected by heat cold or moisture.
4th—That it can be tightly tamped without risk of explosion.

Risks of Accidents Will Be Very Greatly Lessened,

KISKS OI ACCIDENTS WILL BE VEFY GREATY LESSENCY, not altogether overcome, by a general use of this powder in the mines. "We have yet to hear of a nois human being who has been injured by it."

The Vigorit Powder Company manufacture on the most scientific principles three grades of water, known as Nos. 1, 2 and 3 respectively, designed for the different classes of blasting, and war nied to be superior to any powder it use. The prices for Vigorit will be the same as are asked a corresponding grades of Giant and Hercules.
